

Welcome to the 21st Century of Surveying

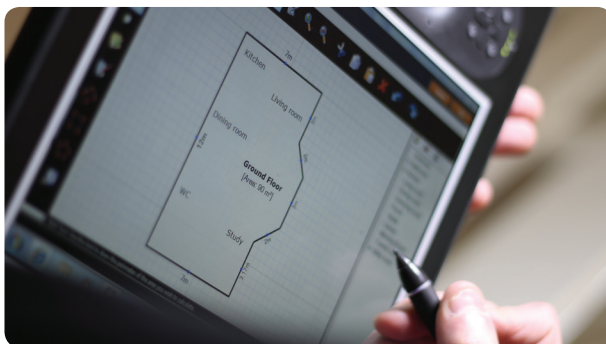

Q-Mobile from Quest is a revolutionary intelligent property data capture tool that replaces manual paperbased site notes.

Whilst on site, Q-Mobile creates significant efficiencies for surveyors, giving them access to electronic comparables and related property information, in addition to improving audit capabilities.

The automatic validation procedures and digital input help to reduce human error and removes indecipherable site notes, therefore supporting surveyor and lender risk management strategies.

83	ZF639168	09 JUN 11	SL6	REP	40, Rinkley Road, Maidenhead, Berks	MV	PP	FP	2	1
83	ZF632001	03 JUN 11	SL6	6ER	7 Bath Court, Powney Road, MAIDENHEAD	MV	EV	FP	1	1
80	ZF911444	20 OCT 11	SL6	2PZ	Flat 23 Fairways, Shoppenhangers Road, MAIDENHEAD, BERKS	FA	EV	FP	2	0
80	E5000303	06 NOV			22, Maidenhead					

With access to comparables and related property information, the survey can be completed and signed off on site.

The intelligent drawing tool allows for easy input of room details and automatically calculates floor areas, subsequently populating this data into the site notes.

- ✓ All data is held together at case level i.e. site notes, sketch plan, photos, lender's form and comparables.
- ✓ Can incorporate comparables from your Quest database and Land Registry sales.
- ✓ Built in validation to ensure data is captured correctly and fully, i.e. requires a minimum of 3 comparables to be supplied.
- ✓ Sketch data is captured and mapped into the site notes.
- ✓ Site notes data is captured once and automatically mapped into lender's form.
- ✓ Paperless valuations, all data required is provided electronically. No need to print anything.

Operational Efficiency
Nothing gets lost in translation
Surveyors workloads optimised in the field
